

Liquid Scrubber

Smoke and Soot Removing Wash Additive

PRODUCT OVERVIEW

Liquid Scrubber is a wash additive for soft contents restoration that increases the rate of restoration for heavy soot affected goods. In most cases, this product eliminates the need for pre soaking when restoring soot affected soft goods because it is added directly to the wash cycle.

Product Name: Liquid Scrubber

Part #: 50104

Order online at www.esportastore.com or by calling 800.881.7781

APPLICATIONS

As a pre treatment for:

- Removing smoke and soot from shoes, purses, bags, stuffed goods, laundry and other soft contents

DIRECTIONS FOR USE

- In an iS4000 Wash System: Connect to pump #6. Select Liquid Scrubber Pre Treatment when selecting your wash program.
- In an ES-3300 Wash System: Manually measure 30oz of Liquid Scrubber and pour into the front door of the system before the start of the first fill in either a Heavy Soil or Extra Heavy Soil wash program.

Training, Certification, and Continuing Education for Esporta Certified Operators.

SERVICE OVERVIEW

Training is a cornerstone to success in soft contents restoration. The technicians that are responsible for restoring soft contents with the Esporta Wash System must be trained and certified by Esporta Wash Systems Inc. After completing the initial training, technicians should be participating in the free monthly continuing education webinars. Annual Esporta Wash System Operator re-certification is a requirement of being part of the Esporta Certified Operators and can be completed free of charge.

OPERATOR TRAINING

Learn proper procedures for restoring soft contents using the Esporta Wash System in our online training program that includes 17+ tutorial videos that demonstrate step-by-step how to perform all of the key tasks related to restoring soft contents, operating the Esporta Wash System, and conducting routine maintenance. You can train an unlimited number of employees per location when you register for this program.

12 month access part #62326

Lifetime access part #62335

Order online at www.esportastore.com or by calling 800-881-7781

CONTINUING EDUCATION

Esporta Certified Operators are invited to join us for our free monthly continuing education webinars where we share best practices related to restoring soft contents with the Esporta Wash System and business development. Participation in the live events is recommended so that operators can ask questions and interact during the session. However, if you miss an event you can view a recording of the presentation on our Member Resources Page.

Three easy ways to sign up to receive invitations to webinars and get access to our Member Resources Page:

Extreme Laundry Bright

A power boosting laundry additive for maximum soot and soil removal on soft contents and laundry.

PRODUCT OVERVIEW

Extreme Laundry Bright removes organic and inorganic stains from water and soot affected soft contents and laundry. It is effective at brightening dull whites and colors and can be used in a wash inside the Esporta Wash System. This product was developed to assist in salvaging extra heavy soot affected white laundry and has grown in popularity due to its ability to lift stains and use when cleaning colors.

Product Name: Extreme Laundry Bright

Part #: 50027

Order online at www.esportastore.com or by calling 800.881.7781

APPLICATIONS

When cleaning laundry and soft contents affected by heavy and extra heavy soot and soiling from soot or water. Safe for use on whites, lights, and colors.

DIRECTIONS FOR USE

In an ES3300

- Manually measure 30 oz of Extreme Laundry Bright and pour it into the front door of your Esporta ES-3300 before the start of your first water fill.

In an iS4000

- Manually measure 20 oz of Extreme Laundry Bright and pour it into the front door of your iS4000 before the start of your first water fill.

As a stain removing pre-spray

- Pour Extreme Laundry Bright into a spray bottle at 100% strength. Spray onto the surface in the area of the stain and gently brush. Allow to sit on fabric but not dry before washing in the Esporta Wash System.

Extreme Oil & Soot Pre-spray

Soot and grease remover for fire bunker gear and industrial coveralls

PRODUCT OVERVIEW

Extreme Oil & Soot is a powerful pre-spray that attacks soot, oil, and grease loosening them and preparing them for removal in the Esporta Wash System. This product is recommended for use on fire fighter's turnout gear and industrial coveralls due to the scent of the product that makes it less desirable for general soft contents restoration.

Product Name: Extreme Oil & Soot

Part #: 50019

Order online at www.esportastore.com or by calling 800.881.7781

APPLICATIONS

As a pre treatment for:

- Removing soot, oil, grease, or tar from fire fighter's turnout gear and industrial coveralls

DIRECTIONS FOR USE

- Spray directly onto the item being processed at 100% strength
- Allow product to sit for up to 30 minutes
- Brush with a soft bristle brush to lift contaminant
- Wash in Esporta Wash System

Garment Finishing Equipment

Finish garments professionally

PRODUCT OVERVIEW

Professionally finishing the garments that your company restores is one of the most important part of the process. The finishing of garments is what creates the first impression on the work that you have done. In order to finish garments effectively and efficiently, you need to have the right tools. Using Grandma's old ironing board just wont cut it. (Sorry Grandma - we still love you!)

COMMERCIAL EQUIPMENT LINE

Mold Stain Remover

Easily remove most mold stains from textiles and hard surfaces

PRODUCT OVERVIEW

Concrobium Mold Stain Remover is scientifically proven to detach mold growth from surfaces allowing efficient removal using the Esporta Wash System. This product has show to remove mold stains that otherwise couldn't be removed with any amount of soaking and scrubbing. Simply spray the blended liquid onto the surface and literally watch the mold stains disappear.

Product Name: Concrobium Mold Stain Remover

Part #53060

Order online at www.esportastore.com or by calling 800.881.7781

APPLICATIONS

This product can be used on soft contents and laundry as well as hard contents and structural remediation projects. We recommend testing on an inconspicuous section if there is a concern of discoloration.

DIRECTIONS FOR USE

Follow the instructions on the bottles to combine the two part product with water. Mix the solution and allow to sit for 30 minutes stirring every so often to mix. After 30 minutes the product can be poured into a spray bottle or pump sprayer to apply to the surface you are treating. Spray onto surface and allow to sit. Mold stains will disappear. If being applied to soft contents or laundry, the items can then be washed in the Esporta Wash System.

Boot & Shoe Polish Kit

A collection of premium shoe polish creams in a wide variety of colors for professionally finishing leathers

PRODUCT OVERVIEW

Polishing leather boots and shoes is a critical step of the restoration process and is what creates the first impression on the work that your company has done. Esporta has searched the shoe care industry to find the best available leather shoe and boot polish on the market. These shoe polishes are cream based rather than traditional wax based polishes. This results in quicker application and improved absorption into the leather resulting in a superior finished product.

Colors include:

- Light brown (62074)
- Medium brown (62076)
- Dark brown (62075)
- Black (62073)
- Burgundy (62080)
- Red (62077)
- London tan (62081)
- Navy blue (62079)
- Neutral (62072)
- White (62078)

Product Name: Shoe Polish Cream - 10 Color Set

Part #62072-10

Order online at www.esportastore.com or by calling 800.881.7781

APPLICATIONS

When finishing leather boots and shoes after they have been cleaned.

DIRECTIONS FOR USE

Dip the dauber brush (62019) into the jar of polish and collect a generous amount of polish. Rub the polish onto the shoe or boot in a circular motion until entire surface has been coated. Take care to match polish color to leather color and not to get polish on contrasting colored leather or thread. Allow polish to rest for five minutes or more before buffing with a shoe shine brush (62082).

Esporta Spotting Kit

A collection of pre-treatment spotters each designed to remove a specific stain type.

PRODUCT OVERVIEW

The Esporta spotting kit includes each of the following stain removers:

- Oil & Grease Stain Remover
- Oxy Spray General Stain Remover
- Protein and Blood Stain Remover
- Cosmetic Stain Remover
- Rust Stain Remover
- Orangel Degreaser

Product Name: Spotting Kit

Part #: 50011

Order online at www.esportastore.com or by calling 800.881.7781

APPLICATIONS

When cleaning soft contents, laundry, textiles, or sporting goods that have been affected by any of the related stains.

DIRECTIONS FOR USE

Apply the appropriate stain remover to the stain and allow product to sit but not dry. Gently brush with a soft bristle brush or a spotting bone. Wash in an Esporta Wash System.

Stage 3 Disinfectant

Organic contamination eliminator

PRODUCT OVERVIEW

A built-in sour plus a sanitizer that contains peroxyacetic acid and other oxygen-based cleaning agents. Force Additive is proven effective in killing all bacteria including the feared MRSA staphylococcus aureus, viruses, and mold spores with 99.9997% efficacy.

Product Name: Stage 3 Disinfectant

Part #: 50003

Order online at www.esportastore.com or by calling 800.881.7781

APPLICATIONS

Stage 3 Disinfectant is connected to pump #3 on the Esporta Wash System. This product is what kills bacteria, mold, and viruses during a wash in the Esporta Wash System.

DIRECTIONS FOR USE

- Ensure that the PVC pipe is on the end of the hose that gets dropped into the detergent pail. It is critical that this pipe stays on the end of the hose so that the hose does not curl up and that it goes directly to the bottom of the pail allowing it to draw fluid.
- The black rubber squeeze tube that runs through the peristaltic pump needs to be replaced on a monthly basis regardless of frequency of use. Monthly replacement of this tube is required because the Stage 3 Disinfectant will degrade the pump tube causing it to fail.
- Perform a pump calibration on a monthly basis to ensure that the detergent pump system is producing the correct volume of detergent.
